TABLE OF CONTENTS

<u>Table No.</u>	<u>Page No.</u>
Highlights	3
1. Federal order minimum Class and blend prices for milk of 3.5 percent butterfat content, f.o.b. market or other indicated point, and butterfat differentials, November	4
2. Federal order minimum Class I and blend prices for milk of 3.5 percent butterfat content, f.o.b. market or other indicated point, January-November averages	6
3. Number of producers delivering milk to handlers regulated under Federal orders, total deliveries, and average daily deliveries per producer, November.	8
4. Producer milk deliveries used in Class I and gross Class I sales by handlers regulated under Federal orders, November . . .	10
5. Producer milk deliveries to handlers regulated under Federal orders and deliveries used in Class I January-November	12
6. Total fluid items, whole milk, skim milk items, milk and cream mixtures, and cream sold in marketing areas defined by Federal milk orders, for markets where such information is available, October, with comparisons.	14
7. Federal milk order Class I formula price information, November	18
8. Prices and economic indexes used in Federal milk order formulas to determine November prices, with comparisons.	20
9. Federal order base and excess prices for milk of 3.5 percent butterfat content, November.	21
9a. Seasonal incentive fund included under various Federal milk orders, November.	21
10. Sales of skim milk items and lowfat milk (2% milk) as a percentage of total fluid milk sales in Federal milk order markets, July 1962, 1964, 1966, and 1967	22
Lowfat milk sales in Federal milk order markets.	26
Major order actions, November.	27

FEDERAL MILK ORDER MARKET STATISTICS

Highlights

NOVEMBER 1967

New Order. On November 1, 1967 a new order for the Minnesota-North Dakota area became effective. There are now 74 marketing areas under Federal milk order regulation.

Producer Deliveries. A total of 123,100 producers delivered 3.6 billion pounds of milk to regulated handlers in 66 comparable markets during November 1967. This is 0.9 percent below producer deliveries in November 1966. Average daily delivery per producer increased from 951 pounds in November 1966 to 988 pounds in November of this year. Producer numbers, producer deliveries, average butterfat percentages, and average daily deliveries per producer for individual markets are shown on table 3.

Producer Deliveries Used in Class I. The volume of producer deliveries used in Class I in 66 markets decreased 0.6 percent from last year, to a total of 2.6 billion pounds for the month of November 1967. This is the fourteenth consecutive month in which Class I sales in comparable markets have been below those for the corresponding month a year earlier. The average utilization percentage for November was 72 percent, up from 71 percent last year. Twenty-six markets showed an increase in the utilization percentage, five showed no change, and the remaining 35 markets showed a decrease (See table 4).

Gross Class I sales, which comprise total Class I sales by regulated handlers, in-and-out of defined marketing areas, decreased 0.3 percent in the 66 markets for the month of November.

Minimum Prices. The weighted average Class I price paid by handlers in the 66 markets for 3.5 percent milk was \$5.98 per hundredweight, nine cents lower than the \$6.07 per hundredweight price in November 1966. Minimum Class I prices for November were higher in 11 markets and lower in the remaining 55 markets.

Producers in the 66 markets received a weighted average blend price of \$5.53 per hundredweight for 3.5 percent milk, two cents lower than the \$5.55 price received by producers in November 1966. Producers received higher blend prices in 19 markets, the same in two markets, and a lower price in the remaining 45 markets. Class prices, blend prices, and associated butterfat differentials, by markets are reported on table 1.

Fluid Milk Sales. Total in-area fluid milk sales for November 1967 in 67 marketing areas are estimated to be about 2.1 billion pounds, 0.2 percent below such sales in November of last year. Complete October in-area sales for total fluid items, and for the four major fluid product groupings (whole milk, skim milk items, mixtures, and cream), are reported on table 6.

YEAR TO DATE

Minimum Prices. The weighted average Class I price for the January-November period for the 66 markets was \$5.93, or 32 cents higher than the \$5.61 price in 1966. The 1967 weighted average blend price, at \$5.21, was 23 cents higher than the blend price of \$4.98 reported for this period in 1966 (See table 2).

Producer Deliveries and Deliveries Used in Class I. Milk deliveries and deliveries used in Class I are reported for individual markets on table 5. In the first 11 months of this year, compared to the same period in 1966, producer deliveries for the 66 markets were up 0.6 percent, and deliveries used in Class I were down 2.5 percent. Data for the 66 markets and for all markets are summarized below:

Producer Milk Deliveries and Deliveries Used in Class I, January-November

Markets	Producer Deliveries			Deliveries used in Class I		
	1967	Change from 1966		1967	Change from 1966	
	1,000 lb.	1,000 lb.	Percent	1,000 lb.	1,000 lb.	Percent
66 Comparable markets ^{1/}	43,796,366	+282,531	+ 0.6	28,049,374	-715,947	- 2.5
7 Non-comparable markets ^{2/}	5,460,126	+2,054,522		3,369,511	+1,101,190	
74 All markets ^{3/}	49,256,492	4/+553,049	+ 1.1	31,418,885	4/-445,834	- 1.4

^{1/} Markets under continuous regulation since January 1, 1966, which have had no significant marketing area expansion.

^{2/} Upper Florida, Milwaukee, Rock River Valley, Northwestern Indiana, Southern Illinois, Central Illinois, and Minnesota-North Dakota. ^{3/} Excludes Sioux City.

^{4/} Includes 1,784,004 thousand pounds of producer receipts and 831,077 thousand pounds of Class I for the Chicago market, January-April 1966.

Lowfat Milk Sales in Federal Order Markets

With the exception of 1967, in-area-fluid milk sales have been increasing over the last five years. However, this rate of increase has been less each year. January-October 1967 sales were about eight-tenths of one percent below sales January-October 1966.

Total fluid milk sales in Federal order markets are subdivided into four major product groups: Whole milk items, skim milk items, milk and cream mixtures, and cream items. Milk and cream mixtures, and cream constitute only about 2 percent of total fluid sales. Whole milk items (plain and flavored whole milk) and skim items (skim milk, lowfat milk, buttermilk, and flavored milk drinks) constitute 98 percent of total fluid milk sales.

Change in sales relationship and butterfat content of the four major fluid milk product groups and total fluid products, 1963-67 are summarized below:

Year	Whole Milk Items			Skim Milk Items			Milk and Cream Mixtures			Cream Items			Total Fluid Items		
	Pct. change over prev. year	Pct. of total fluid	Bf. test	Pct. change over prev. year	Pct. of total fluid	Bf. test	Pct. change over prev. year	Pct. of total fluid	Bf. test	Pct. change over prev. year	Pct. of total fluid	Bf. test	Pct. change over prev. year	Pct. of total fluid	Bf. test

1/ Excludes Boston, Springfield, and Worcester.

2/ January through October.

There has not been much of a change in the sales relationship and butterfat content of mixtures and creams. However, there has been a noticeable change in the sales relationship and butterfat content of whole milk and skim milk items to total fluid sales.

Whole milk sales as a percentage of total fluid sales have been decreasing. Whole milk sales were lower in 1966, and thus far in 1967 are considerably lower than in 1966. Skim milk item sales, in contrast, are increasing. This increase is larger thus far in 1967 than in any of the last five years, and skim items now represent a larger portion of total fluid sales than ever before. The increase in skim milk items thus far in 1967, however, has not been large enough to offset decreases in the other product groups (mainly whole milk items), with the result that total fluid sales for the January-October 1967 period are below sales of the same period in 1966.

A closer look at the growth of skim milk items in individual markets for selected months, July 1962, 1964, 1966, and 1967 are shown on table 10. In July 1967, sales of skim milk items represented 20 percent or more of total fluid sales in 28 Federal order markets. However, in July 1962, they represented 20 percent or more of the total fluid sales in only two markets.

It is evident that much of the decrease in the importance of whole milk items and the increased importance of skim milk items can be attributed to the emergence on the market of a lowfat milk product, ranging in butterfat content from 1.5 to 2.5 percent, and commonly referred to as "two-percent milk." Lower price and weight consciousness on the part of some consumers are factors contributing to the increased use of lowfat milk.

Sales of lowfat milk in Federal order markets in July 1962 represented 2.3 percent of total fluid sales and 24 percent of total skim sales. In July 1967 sales of lowfat milk represented 8.6 percent of total fluid sales and 55.6 percent of total skim sales. In July 1962, 15 markets did not report sales of lowfat milk. In July 1967, only three markets did not report sales of lowfat milk and since then, lowfat milk has been introduced in all three of these markets. In July 1962, lowfat milk sales accounted for 50 percent or more of the total skim milk items sold in 10 markets. In July 1967, 40 markets reported that sales of lowfat milk comprised over one-half of their total sales of all skim milk items.

In many markets, increased sales of lowfat milk have resulted in large increases in the total sales of skim milk items, usually at the expense of whole milk items. In other markets, there has been a substitution of lowfat milk for plain and fortified skim milk with the result that sales of skim milk items have not shown large increases.

Table 10 shows for 72 Federal milk order markets sales of, whole milk items, skim milk items, and two-percent milk, as a percentage of total fluid sales. The table also shows two-percent milk sales as a percentage of total sales of skim milk items.

MAJOR ORDER ACTIONS, NOVEMBER 1967

Suspensions:

Lubbock-Plainview - November 1 (32 FR 15388, 11/3/67). Action suspends for the months of November and December 1967 the limitation that not more than 15 days' production from a producer may be diverted.

North Texas - November 1 (32 FR 15388, 11/3/67). For the months of November 1967 through February 1968, this suspension will permit a Class II classification of milk moved to bakeries, soup companies or other food product manufacturing plants where it is used for manufacturing product uses.

Puget Sound - November 15 (32 FR 15706, 11/15/67). For the month of October 1967, this suspension permits the volume of "Grade A" milk moved from a supply plant to another pool supply plant as well as to a distributing plant to be counted for purposes of meeting the shipping requirements of a pool supply plant.

Texas Panhandle - November 1 (32 FR 15389, 11/3/67). Action suspends for the months of November and December 1967 the provision that a handler or a cooperative association may not divert producer milk on more than 15 days during each of the months of July through February.

New Order:

Minnesota-North Dakota - November 1 (32 FR 13703, 9/30/67). (Other provisions were effective October 1, 1967.) The basic formula price is the Minnesota-Wisconsin price. The order specifies that from the effective date of the order through April 1968, the basic formula price used to compute the Class I price shall not be less than \$4.05. From November 1, 1967 through April 30, 1969, the Class I price shall be the basic formula price for the preceding month plus 86 cents. Twenty cents is added to this price through April 1968. The Class II price is the basic formula price for the month.

The Class I butterfat differential is the Chicago 92-score butter price for the preceding month times 0.12. The Class II butterfat differential is the Chicago 92-score butter price for the month times 0.115; and, the producer butterfat differential is the weighted average of the Class I and Class II differentials. The expense of administration is four cents per hundredweight and the marketing service deduction is five cents per hundredweight.

For plants located outside the base zone, the Class I price is increased or decreased 1.2 cents for each 10 miles or fraction thereof that such plant is located beyond the perimeter of the base zone. The location adjustment is added to the Class I price if the plant is located in North or South Dakota, and is subtracted from the Class I price if the plant is located in Minnesota.
